

# Product Information Sheet

## Dust Suppression / Positive Pressure

AUSTRALIAN MADE | AUSTRALIAN OWNED | MADE TO ORDER

Our dust suppression systems are a customised solution for each application with the right approach identified from the numerous choices available through careful consideration of several key factors.

CP Group Aus have designed and manufactured dust suppression systems for specific equipment, with each application using positive pressure to prevent environmental ingress. This achieves a longer mechanical life and greater productivity.

All our dust suppression systems come with an in-built fire suppression system providing added protection.

### QUALITY:

Made to Australia's high quality standards

### PRACTICAL & SAFE:

Filters supplied and easy to change. In built fire suppression system.

### 5 STAR POWER CONSUMPTION:

\* \* \* \* \*
